Annualised recurring fees* (€ m)

AuM breakdown (~%)

- Stable AuM margins: Private Clients: 63 bps (2021: 62 bps); Wholesale & Institutional Clients: 12 bps (2021: 12 bps)

*Annualised recurring securities commission is determined by multiplying the AuM on the reporting date by the management fee per client to determine the expected annualised management fee, assuming the AuM remains unchanged. The expected annual transaction fees related to these client portfolios are added.

Investment Banking Clients: Stable commission income in challenging markets

Commission income (€ m)

- Operating profit before tax fell to €9.7m (2021: €18.8m) in the wake of higher staff costs, lower income from securities trading and a book profit from the sale of Global Property Research in 2021
- 37 transactions were completed with a total volume of €8.1bn

Interest margins improved in H2 2022

Interest income (€ m)

Interest margin (12-mth moving average, %)

- Interest income up on the back of ECB interest rate hikes in the second half of the year
- In 2022, growth in our loan portfolio supported interest income
- Lower early redemption fees in 2022: €5.8m (2021: €13.3m), driven by fewer prepayments

* The clean interest margin equals the gross interest margin adjusted for interest equalisation and interest-related derivatives amortisation.

Convergence path of savings rate to ECB deposit rate main driver of interest income in the next few years

Potential convergence paths of client rate on savings to ECB deposit facility rate

Interest income to benefit from slow convergence to ECB deposit facility rate
(€ m – delta to total interest income 2022)

Assumptions

- As forward rates are relatively flat, we assume convergence to the ECB deposit rate as a proxy for convergence to long-term rates as well
- A replicating book with around 50% repricing within one year
- As savings rate increases, we expect 50%-60% of current accounts to flow to interest-bearing savings accounts. We expect a stable base of current accounts will remain at a 0% client rate
- Client rate projections are based on various rates of convergence to the ECB deposit facility rate
- We assume stable volumes for client deposits and the loan portfolio

Income from securities and associates

- Income from securities and associates at €7.8m (2021: €65.9m), with the decrease caused by:
- Participating interests (Van Lanschot Participaties and Bolster Investment):
 - In 2022, the result on holdings in the private equity portfolio amounted to €16.3m, partly due to a €7.1m book profit from the sale of a stake in the Newion I private equity fund
 - In 2021, the result on these holdings was €40.3m, driven by several sales results and (re)valuations
- Co-investments in own products:
 - Result at –€8.6m (2021: €23.0m) – within income from securities and associates, driven by negative market performance
 - Futures are used to manage our risk appetite related to these investments, amounting to €11.5m (2021: - 9.8m) – within result on financial transactions

- Result on structured products activities
 - Year-end result: €6.2m negative (2021: -€4.6m)
 - De-risking of the structured products portfolio was completed by year-end 2022
